Art

Throughout the ages Art and Design has played a crucial role in the cultural development of society, from architecture and fashion to the printed word. The work of Artists and Designers is accessed and experienced by everyone on a daily basis. Artists and Designers need to work with integrity and respect for others as their work has the power to change the world, set trends and fashions, build the cities and landscapes of the futures, and develop new technologies and innovations. Through the pursuit of creative thinking and solutions to life's problems Artists and Designers will support economic growth for generations to come.

Year 8

Module Title	Module Overview
Colour still-life	Students draw mechanical objects using harmonious/tertiary colours.
3D construction	Students work collaboratively to make a 3D cardboard sculpture.
Futurism	Students learn to show movement in art through drawing.
Photo-montage	Students recreate a photomontage of a building in pencil, paint, colour pencil and collage. PCs used to broaden skill set.
Urban landscape	Students create a contemporary landscape using collage, print, paint.
Architextiles	Students use applique, stencil and machine embroidery techniques to recreate an architectural design using fabric.
