

Think about units.

length cm, m  
area cm<sup>2</sup>, m<sup>2</sup>  
Volume cm<sup>3</sup>, m<sup>3</sup>

### Foundation Tier Formulae Sheet

Perimeter = distance around the shape

#### Perimeter, area and volume

Area = space inside the shape

Trapezium

Where  $a$  and  $b$  are the lengths of the parallel sides and  $h$  is their perpendicular separation:

$$\text{Area of a trapezium} = \frac{1}{2} (a + b) h$$

add together the parallel sides, halve it, then multiply by the height.

Volume of a prism = area of cross section  $\times$  length

look at the shape at the end and work out the area, then multiply by length

Where  $r$  is the radius and  $d$  is the diameter:

$$\text{Circumference of a circle} = 2\pi r = \pi d$$

$$\text{Area of a circle} = \pi r^2$$

Remember:  
Chicken pie is delicious  
Apple pies are too

Circles

#### Pythagoras' Theorem and Trigonometry

In any right-angled triangle where  $a$ ,  $b$  and  $c$  are the length of the sides and  $c$  is the hypotenuse:

$$a^2 + b^2 = c^2$$

In any right-angled triangle  $ABC$  where  $a$ ,  $b$  and  $c$  are the length of the sides and  $c$  is the hypotenuse:

SOH CAH TOA

$$\sin A = \frac{\text{opp}}{\text{hyp}}$$

$$\sin A = \frac{a}{c}$$

$$\cos A = \frac{b}{c}$$

$$\tan A = \frac{a}{b}$$

$$\cos A = \frac{\text{adj}}{\text{hyp}}$$

$$\tan A = \frac{\text{opp}}{\text{adj}}$$

#### Compound Interest

Where  $P$  is the principal amount,  $r$  is the interest rate over a given period and  $n$  is number of times that the interest is compounded:

$$\text{Total accrued} = P \left( 1 + \frac{r}{100} \right)^n$$

#### Probability

Where  $P(A)$  is the probability of outcome  $A$  and  $P(B)$  is the probability of outcome  $B$ :

$$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$

END OF EXAM AID

eg. £2000 invested  
at 3% per annum  
for 4 years.  
you do  
 $2000 \times 1.03^4$

Trapezium, add parallel sides, halve, then multiply by height

### Higher Tier Formulae Sheet

**Perimeter, area and volume**

Where  $a$  and  $b$  are the lengths of the parallel sides and  $h$  is their perpendicular separation:

Area of a trapezium =  $\frac{1}{2} (a + b) h$

Volume of a prism = area of cross section  $\times$  length

Where  $r$  is the radius and  $d$  is the diameter:

Circumference of a circle =  $2\pi r = \pi d$

Area of a circle =  $\pi r^2$

**Quadratic formula**

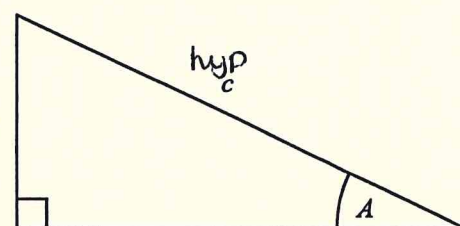

The solution of  $ax^2 + bx + c = 0$  where  $a \neq 0$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

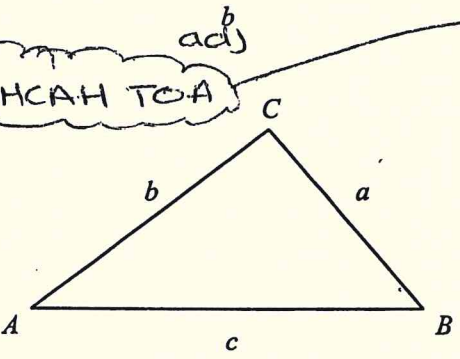

Use this when the question says give answer to  $x$  decimal places

On non-calc papers you should factorise

**Pythagoras' Theorem and Trigonometry**

SOHCAHTOA

In any right-angled triangle where  $a, b$  and  $c$  are the length of the sides and  $c$  is the hypotenuse:

$$a^2 + b^2 = c^2$$

In any right-angled triangle  $ABC$  where  $a, b$  and  $c$  are the length of the sides and  $c$  is the hypotenuse:

$$\sin A = \frac{a}{c} \quad \cos A = \frac{b}{c} \quad \tan A = \frac{a}{b}$$

$$\sin = \frac{\text{OPP}}{\text{hyp}} \quad \cos = \frac{\text{adj}}{\text{hyp}} \quad \tan = \frac{\text{OPP}}{\text{adj}}$$

In any triangle  $ABC$  where  $a, b$  and  $c$  are the length of the sides:

sine rule:  $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

cosine rule:  $a^2 = b^2 + c^2 - 2bc \cos A$

Area of triangle =  $\frac{1}{2} a b \sin C$

cos rearrange to:  $\cos A = \frac{b^2 + c^2 - a^2}{2bc}$

**Compound Interest**

Where  $P$  is the principal amount,  $r$  is the interest rate over a given period and  $n$  is number of times that the interest is compounded:

$$\text{Total accrued} = P \left( 1 + \frac{r}{100} \right)^n$$

**Probability**

Where  $P(A)$  is the probability of outcome  $A$  and  $P(B)$  is the probability of outcome  $B$ :

$$P(A \cup B) = P(A) + P(B) - P(A \cap B)$$

$$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$

$$P(A \cap B) = P(A|B) \times P(B)$$

$$P(A \text{ and } B) = P(A \text{ given } B) P(B)$$
